Professional Experience

MANAGER IN INNOVATION AND TRANSFORMATION, *BANORTE*

February 2021 – present

- Perform a detailed tracking of the entire product development process to prevent errors and failures.
- Analyze automation and simulate product executions and performance to increase the chances of detecting failures.
- Carefully review all specifications for services and products.
- Handling microservices documentation.
- Identify as many issues as possible that may reduce the quality of the developed software before it is implemented in a production environment.
